REPLY TO

ATTN OF:

ERD:RHB:6185

SUBJECT:

Endangered Species Act/Standley Lake Diversion Project

TO:

Gail Hill, Environmental Monitoring Branch

The U.S. Fish and Wildlife Service recently (see attached May 22, 1992 letter) expressed concern that a certain plant, listed as a threatened species, may be present in Operable Unit No. 3. Paragraph 1, page 2 of their letter specifically mentions the construction activity planned for the Standley Lake Diversion Project as one of their concerns. Please address their concerns before any construction activity begins in Operable Unit No. 3. If you have any questions, please consult Bruce Thatcher, ERD's Natural Resource Trustee expert.
